**EXAM  
DATE/TIME**

The MRI procedure you have been scheduled for may require the intravenous injection of a non-iodinated contrast solution. It is used to enhance the ability of MRI to facilitate diagnosis. While there are no known contraindications, mild side effects (nausea, headache) may occur. This solution is not the same used for CT scans, IVPs, or angiography.

I attest that the above information is correct to the best of my knowledge. I have read and understand the entire contents of, and hereby give consent to have a Magnetic Resonance Image Scan.
